Weight of 1.8m Post	9kg each

- This heavy duty stacking post pallet is quite simply brilliant value for money! Our TITAN post pallets are made in Europe and load tested & certified.
- This post pallet base can have post pallet stacking poles inserted in each corner to build the post pallets up into a tower. The height of the poles can be changed to suit your products or application.
- The use of post pallets can negate the need for pallet racks and pallet racking, especially for warehouse temporary racking or peak periods
- The post pallet stacking frames are made from prime quality steel and galvanized for a long and hard wearing life. Each pallet base is rated to 1500kg, and they can be stacked 4 high with a total load of 6 tonnes!
