1200x800x760 Pallet Box with Half Drop Front 1089CA4
CAPC-1089CA

Product Overview

MZ/CAPC/1089CA

Load Capacity
470kg

Options

Half drop front
Solid sides
Feet base
Skid base

Delivery is calculated at checkout according to postcode and pallets used. Collection from our Kettering premises is free.

Specifications	
Capacity	470ltr
Base size	1200x800mm
Type	Full sided
External Dimensions (with feet)	1200x800x760mm
External Dimensions(with skids)	1200x800x780mm
Internal Dimensions	1110x710x600mm
Weight - 4 Feet version	32kg
Weight - 2 skids version	35kg
Static Load Capacity	3300kg
Stackable Quantity High	6 high
Load Capacity	470kg

Plastic box pallets have a varied number of uses and can be found in all industries including food, medical through to automotive. The pallet boxes are a standard pallet base size and have the option for feet, skids, or wheels to be fitted underneath. The pallet skids are recessed on the edges to sit inside the top lip to give a positive and safe stacking. The box pallets are suitable for food and are fully recyclable . The plastic pallet box is made with a double-skinned structure, reinforcing corner and central side columns, and reinforcement ribs in the base structure, all of which substantially improve resistance to compression loads. The pallet box is suitable for use with heavy loads during transport, storage of bulk and packaged products or liquids. The plastic pallet boxes are constructed from High Density Polyethylene (PE-HD) . As a result, the pallet box has excellent resistance to shocks, stacking, and temperature extremes.
