Overall Width inc Brake	1410mm
Platform Size	1350mm x 1350mm
Step Tread Width x Depth	1150mm x 200mm
Step Tread Vertical Spacing	200mm approx
Load Capacity	300kg

- The steps platform height is 2540mm which should allow the doors to open above it - Double check though your height! The platform is from 3mm chequerplate and is 1200mm x 1200mm square.
- Handrails to 1 side of the step and to 2 sides of the platform with kick plates
- These mobile container steps sit on wheels so they can be moved around. There is a standard lever brake arm that dis-engages the wheels and sets the legs on the ground to lock the step in place.
- As standard, these container steps are in a painted finish, blue RAL 5010. We can galvanize them as an option to give a long weatherproof life, but with their size, its not cheap!
- The steps are made and supplied in 2 sections for transport, a step section and a platform tower. You will need to bolt these together on site. You will need a forklift or similar to unload the steps and to stand them upright for bolting together.
