Tube Frame	19x2 mm
Mesh	50x50x4 mm
Axle	25x2 mm
Handle Width	430 mm

Suitable for any site, this highly mobile, two wheel Garden Centre Trolley is ideal for interior and exterior use on flat or sloping ground. For customer use, this mobile trolley can even be used on rough surfaces such as gravel, stones or steps. A wide track and four wear protected frame legs provide stability for the garden centre trolley no matter where the load is placed. The long Warm Touch comfort handle allows mobile ease of steering in confined places. Loading the trolley is easy with a load bed height of only 300mm. 150mm high sides restrain whatever a garden centre customer might select, tall plants, bags of compost or fertiliser, tools and other unstable items. The garden centre trolley can be conveniently and safely pushed or pulled around the garden centre.
