Specifications	
External Dimension WxDxH	465x - x310 mm
Weight	4.5 kg

This standard Safety Step is made from tough medium density polyethylene with a load bearing of 180kg. Perfect for use in commercial premises or lighter industrial applications It has a moulded tread to aid grip and handles are incorporated for easy handling. The step is nestable thus lowering transport costs and easing storage The safety steps are UV stabilised so can be left outside without fear of cracking or discolouration The step is available in a range of colours, you can choose the colours in the options
