260kg

Delivery is calculated at checkout according to postcode and pallets used. Collection from our Kettering premises is free.

Specifications	
External Dimension WxDxH	475x540x415 mm
Weight	10 kg

This premium Safety Step is made from tough medium density polyethylene with a load bearing of 260kg. Perfect for use both in industrial and commercial applications Fitted with anti slip abrasive strips to aid grip, and with incorporated handles for easy handling. The step is nestable thus lowering transport costs and easing storage Our Premium Safety Steps are rigorously tested to comply with BS EN14183 European Safety Standard The safety steps are UV stabilised so can be left outside without fear of cracking or discolouration and are resistant to most chemicals. They are suited to wash down applications and wet environments The step is available in a range of colours, you can choose the colours in the options
