SWL	1200kg

This versatile bulk bag holder is designed to safely support tonne bags, including FIBC big bags and bulk bags of up to 1000 litres. Manufactured from a 40x40mm box section and supplied with a sheet steel deck as standard, we also offer the option of 50x50mm mesh deck to suit different applications. Fork lift hoops are an additional option as are castors allowing easy manoeuvrability. The bag holder is supplied in a painted finish to give long life performance. For added space efficiency, the corner posts are fully removable, allowing the base frame to be quickly demounted and stacked when not in use - ideal for warehouses and industrial environments where storage space is at a premium. Supplied with 1160mm Posts as standard. Custom post heights are also available to accommodate different bulk bag sizes - simply contact us and provide your required dimensions when ordering.
