| Specifications |            |
|----------------|------------|
| Capacity       | 1000L      |
| Finish         | Galvanized |

This bulk bag container has solid sides, base and lid and can take tonne bags or FIBC (Flexible Intermediate Bulk Containers) big bags or bulk bags of 1000 litres. This protective container has a square base and is galvanized for a long lasting life, perfect for indoor or outdoor use even when exposed to the elements, the bulk bag container has a hinged top lid which has a self locking safety rod for fixing at 45° and 90° angles while in use. Inside this bulk bag container are attachments for bag straps so they can be held open inside the container.
