Wheel Configuration	3 Swivel, 1 Swivel Braked
Load Capacity	1000kg

Standard, A Frame Glass trolley for the handling of glass panels, windows and other panel products. The trolley is one rigid construction and can hold upto 1000kg at once, it's easy to load the panels on from either side as the build is symmetrical from side to side. The wooden planks have a 15mm film coat, making the wood more durable in adverse weather conditions, the paint is powder coated and comes in RAL5010 as standard. The planks are 300mm and are staggered from the centre like a zig-zag with 14 planks on each side, the loading plate on each side is 395mm.
