This model boasts 5 steps allowing to reach higher levels of shelving or racking systems. The steps are attached to one end of the trolley enabling easy access with hand rails for safety with the load area in front of the steps giving you the space needed for easy storage of products, without carrying them down the steps first. There are four platforms on this model, giving a lot of space for you to utilise when picking up orders. The sliding step design allows a much smaller footprint than the traditional spring loaded step designs and allows higher access to shelving. We have other models that boast more steps, giving more space for larger orders while also reaching higher areas or have more platforms for storage of smaller items. Our range of order picking trolleys is sure to meet your requirements, but if you require something slightly different; we are more than happy to create a b
