Unlike our other order picking trolleys, this version boasts a basket that can be easily used to store items while they are being moved around. Suitable for small items, it stops items from falling off the trolley if it hits something or if you needed to stop suddenly. It has mesh borders around all sides to close in the basket. The range of order picking trolleys create a quick and easy method of picking and moving orders when needed. When orders are stocked in warehouses, our order picking trolleys save time and make obtaining and delivering orders to different areas such easier.
