This model of order picking trolley boasts 4 steps instead of the previous models 3. This is due to the increased space between the first and second platform. This model is suited for taller products due to the space available whereas some of our other models are more suited to smaller objects. The 4 steps enable you to reach even higher points of any shelving or racking systems you have access to. Designed to be best used in warehouses, our order picking trolleys with steps enable quick and efficient access to any and all items that are required to be moved elsewhere. Able to be designed around your requirements, we are more than happy to create a bespoke trolley that best suits your requirements and property limitations. Our order picking trolleys are crafted by time served professionals that utilise years of experience to create a highly efficient order picking trolleys that are equip
