Load Capacity	600kg
Castor Diameter	125mm
Side Options	4 Sided Mesh
Unit Weight	51kg
Finish	Bright Zinc Plate
Shelf Option	Hinged & Loose
Style	Split Front Gate

- This standard 4 sided Roll Container has double stable front doors allowing the top half of the cage to unloaded first if required. All sides are infilled with a 50x50x3mm mesh panel offering good retention of smaller items.
- To nest when not in use, the steel deck folds up and the sides then fold in. The cages are then nested into the back of each other, inline nesting like a shopping trolley.
- Wheels are 125mm diameter, choice of nylon or rubber tyred with roller bearings, and housed to steel castors with a 2 fixed and 2 swivel configuration.
- The roll pallet as standard has a single load bearing deck. As an option, an integral shelf can be fitted, fixed though at 2/3 height.
- Alternatively, loose shelves can be hooked onto any of the horizontal bars when the cage is assembled.
- Also available as an option is a plastic deck. As standard the deck is a steel framed with 5mm rods welded in to form a mesh.
