- The vented plastic boxes that we offer are perfect for food storage and transport, they are well ariated and non-toxic for food use.
- Plastic box pallets have a varied number of uses and can be found in all industries including food, medical through to automotive. The box pallets are suitable for food and are fully recyclable.
- The pallet boxes are a standard pallet base size and have the option for feet, skids, or wheels to be fitted underneath. The pallet skids are recessed on the edges to sit inside the top lip to give a positive and safe stacking.
- The plastic pallet box is made with a double-skinned structure, reinforcing corner and central side columns, and reinforcement ribs in the base structure, all of which substantially improve resistance to compression loads. The pallet box is suitable for use with heavy loads during transport, storage of bulk and packaged products or liquids.
- The plastic pallet boxes are constructed from High Density Polyethylene (PE-HD). As a result, the pallet box has excellent resistance to shocks, stacking, and temperature extremes. They are suitable for forklifts and any type of tipping devices.

Pallet Box 1092F

Product Overview

Optional Pallet Box Lid

The optional lid can be a useful addition to a pallet box. It offers the option to store boxes outside and helps to reduce cross-contamination where necessary.
